Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Hickman called to suggest amendments to make claims allowable. Agreed that  $8.0 \times 10^{-5}$  k/d would be acceptable, as did examiner. Numerous revisions to clarify that the sheel could comprise two parts, etc. were considered. Examiner noted in last conversation that k/d is defined by applicant as an average, and that the amendment should NOT be considered narrow enough that a single k/d value, whether one single reading or a few isolated samples would read over the claims, So that this is clear, an average k/d is recited to ensure that k/d is considered as defined - an average, whether over a sample or an entire cylinder. .
